

R-Group Analysis

Written by Edmund Champness

Thursday, 30 January 2014 00:00 - Last Updated Monday, 18 June 2018 20:28

This short demo gives a quick introduction to how StarDrop's [R-group analysis](#) functionality can be used to explore the relationships between functional groups at different R-Group positions and a compound's properties. For more information on the scores which are in the example data set, take a look at the demo

[Compound prioritisation and selection](#)

.
